

The Zionist Regime: a Threat for the Entire Region

For nearly eight decades, nations of the region and people worldwide are facing a nefarious manifestation and occupation in Palestine. This manifestation led to the occupation of an Islamic land; the Palestinian people displaced from their own homes and the inhabitants of this land have ever since been encountered with the worst atrocities. On July 19, 2024, the International Court of Justice (ICJ), the highest judicial body of the United Nations in Hague-Netherlands, issued an advisory opinion stating that Israel's continued presence in the Occupied Palestinian Territory is illegal under international law, and that Israel is under an obligation to end its occupation as rapidly as possible.

The essence and nature of the Zionist regime is based on assaultiveness, forceful acquisition, atrocity, mendacity and subterfuge. This regime has so far launched more than 20 wars in the region; invaded all of its neighboring countries without exception; launched military attacks on a number of countries outside the region; and likewise Palestine still occupies the territory of some other Arab countries.

Today, the Zionist regime unprecedentedly has transgressed global limitations of atrocity and has demonstrated that it does not adhere to any of the principles and values of humanity, morality, religion and international standards. According to all libertarians and international laws, the blatant aggressions of this child-killing regime opposed to the oppressed Lebanon and Gaza; and the brutal massacre of innocent women and children over the past one year, are evident illustrations of genocide, atrocity, flagrant violation of human rights and international laws & regulations. Consequently, the International Criminal Court (ICC) has issued arrest warrant of Zionist regime's Prime Minister, Benjamin Netanyahu and former defence chief, Yoav Gallant, for alleged war crimes.

According to the confession of the Zionist authorities themselves, Israel seeks to expand the territory from the Nile River to the Euphrates and establish so-called Greater Israel. This regime seeks to implement the idea of forming a single Zionist state on the entire Palestinian land; and also to execute the "Deal of the Century: Abraham Accords" plan coercively. The Israeli Knesset has already declared that Arabs have no rights in Palestine and it is a Jewish state.

It is evident and obvious that the entire land of Palestine, from the river to the sea, belongs only to the legitimate Palestinians, including Christians, Jews and Muslims. The land of Palestine is not for sale; and no institution or country has the right or the obligation to place it at the disposal of

any other individual or group.

The Islamic countries and Ummah should not ignore of the Zionist regime's lawlessness, ambition, and desire for expansion. For ٧٦ years, this regime has not followed through on what it stated; and from now on, it will not be loyal to any covenant or agreement.

The issue of Palestine has always been the concern of nations throughout these years, and the "World Quds Day" has become an important symbol of the global resistance movement in support of the oppressed Palestinian nation and against the occupying regime and Zionist apartheid in the world.

While the international law clearly acknowledges the right of people to resist colonialism, occupation, and racism, the Israeli regime and its Western allies, through a complex and distorted narrative based on linking and equating resistance with terrorism and extremism, try to divert public opinion in the world from the realities of Israel's crimes and instead they criminalize legitimate resistance.

Today, the world, from East to West, from Islamic to non-Islamic countries, from Muslims to followers of other religions, has come to the realization that resistance is a reality. Today, the cause of Palestine has become a global cause and the "resistance front" has become an undeniable power whereas Quds Day is a manifestation of the continuous effort of a nation to reclaim its motherland.

Ceasing attacks in Gaza and facilitation of all humanitarian aid and its rehabilitation is worldly demand and the Israeli regime must accept this. The Islamic Republic of Iran, like many people around the world, has proudly supported the people of Palestine; and believes that that the complete and comprehensive solution of the Palestinian issue is only and only through the complete realization of the inalienable right of this nation to self-determination and establishment of an independent Palestinian state throughout the whole Palestinian territory with Holy Quds as its capital.
